## Carnation Novelties for 1901.

Ready for distribution February 15th, unless otherwise noted. Prices quoted are for STRONG, WELL ROOTED CUTTINGS. Not less than 6 at doz., 25 at 100 and 250 at 1,000 rate, except where noted.

**Prosperity.**—(Dailledouze Bros.) Formerly known and exhibited as No. 666. In habit, the nearest to the ideal yet produced, making no useless grass, but grows straight up to bloom. It attains a height of 4 ft. by Jan. 1st under no special culture. Very heavy foliage and stiff, upright growth. It is not subject to any of the Carnation diseases. The flowers attain the monstrous size of 4 in. Much freer bloomer than Mrs. Bradt and superior in all other points. It has the perfect calyx of Albertina. Entirely distinct in color, the ground being white, overlaid and mottled with pink, deepening toward the center. Its keeping qualities are unequaled. It has brought the highest price yet paid for a Carnation. Winner of numerous certificates and medals. 50c ea.; \$5.00 per doz.; \$8.25 for 25; \$10.00 for 50; \$16.00 per 100; \$130.00 per 1,000. Ready March 1st.

**Gov. Roosevelt.**—(Ward.) A seedling from the well known variety Gen. Maceo, which it somewhat resembles in habit, but a far more vigorous grower and longer and much stiffer stem. In color, a deep, rich, brilliant scarlet, heavily shaded with maroon. In form, it is as near perfect as any Carnation yet produced. Very large, full flowers, with perfect calyx, fully as good as that of Albertina. Very free, healthy grower. 25c ea.; \$2.50 per doz.; \$12.00 per 100; \$100.00 per 1,000. Ready March 1st.

**Norway.**—(Weber & Sons.) A seedling from Mrs. Fisher. Color, purest white. Flowers 2½ in. to 3½ in. in diameter. A wonderfully vigorous, rapid grower of splendid habit. Responds readily to good culture. The stems are long, strong and graceful and can be cut 2 ft. to 3½ ft. long when well established. It is delightfully fragrant; an excellent keeper and shipper. We believe this variety will fill a long felt want. 15c ea.; \$1.50 per doz.; \$10.00 per 100; \$75.00 per 1,000.

**Egypt.**—(Weber & Sons.) Color, a rich scarlet crimson. Outclasses all other crimsons we have grown. Its distinctive features are its grand color, which is just right for this shade, its exquisite spicy odor, its fine, commercial stem, which attains a length of 2½ to 3 ft., and the uniform large size of flower, averaging 2½ in. to 3 in. when established. Not recommended as being an early bloomer, but can be had in full flower Nov. 1st to 15th, after which it is a continuous and free bloomer. Recommended to all who are looking for a good dark Carnation. 15c ea.; \$1.50 per doz.; \$10.00 per 100; \$75.00 per 1,000.

**Lorna.**—(Dorner & Sons Co.) Large, pure white, fragrant flowers, 3 in. and over in diameter. Well filled center, rounding the flower to a most pleasing form. Comparing it to White Cloud, its parent, it shows a decided improvement in its more compact and stronger growth; foliage of a much deeper, bluish tint, indicating hardiness; longer and decidedly stronger stems; larger flower, with perfect calyx; better form; purer white, and is an earlier and more continuous bloomer. It makes a strong field grown plant and transplants readily, even under unfavorable conditions. 20c ea.; \$2.00 per doz.; \$10.00 per 100; \$75.00 per 1,000.

**Mermaid.**—(Dorner & Sons Co.) A fine formed bloom, of a pleasing shade of salmon pink. Its easy cultivation, strong growth, fine, large flower, and being an early and extremely free bloomer, are its strong points. It has a medium strong stem early in the season, but improves rapidly during the Winter months. The weakness of stem when planted and a slight susceptibility to rust are its only faults, and prevent its being called a first-class variety. It can be successfully grown for Summer blooms in the field. 10c ea.; \$1.00 per doz.; \$6.00 per 100; \$50.00 per 1,000.

**Queen Louise.**—(Dillon.) An extra fine white variety of distinctive qualities. A very strong, healthy grower and transplants easily from the field. Extra large flowers on long, stiff stems. ## Two New Roses.

QUEEN OF EDGELY.

**Queen of Edgely.**—(Floral Exchange.)

The long looked for "pink" American Beauty, being a sport from that popular variety. It is an exact counterpart of American Beauty in every particular, except that of color. It has the same vigorous growth and beautiful foliage of the parent plant. Its fragrance is delicious and closely resembles that of the out-door June Roses. In color, it is a bright pink, approaching Mme. Caroline Testout and Bridesmaid. An excellent point is, that as the Rose grows older, it fades to a lovely shade of light pink. The flowers are large and deep, cup shaped and full, averaging 5 in. when fully developed (some reaching 7 in. in diameter). They are borne on stems often 6 ft. long, with foliage to the flower. Its keeping qualities are excellent, the flowers keeping for a week or longer after being cut. Winner of numerous medals and certificates of merit. No person should fail to secure a stock of this beautiful Rose. Dis-

seminated during April. Strong plants from 2½ in. pots, \$1.00 ea.; \$9.00 per doz.; \$25.00 for 50; \$40.00 per 100. Larger quantities quoted on application.

**Sunrise.**—(Hill Co.) The most gorgeous Tea Rose yet introduced. In close bud form, it shows the high, brilliant colors, seen only in the "Austrian Copper," scarlet and yellow. Both the red and yellow deepen as the flower opens. The open rose is large, perfectly double and of grand form. Thick, glossy foliage. The new growths are the darkest and most beautiful found among Roses. Its freedom of growth and bloom, and the exquisite color, will give it a high place among forcing Roses. Has taken first honors wherever shown, both here and abroad. Strong plants from 2½ in. pots, 20c ea.: \$15.00 per 100.

NEPHROLEPIS WITTBOLDII.

A most desirable Fern for Florists' use. Strong, thrifty plants, ready for 3 and 4 in. pots, \$1.00 ea.: \$10.00 per doz.; \$75.00 per 100.

## Two of the Most Popular Begonias.

Ready for Delivery in June.

**Gloire de Lorraine.**—This is one of the most striking plants that has been introduced for many years. Very compact, dwarf habit, making handsome specimens 14 in. in height and breadth. The plant is completely covered with its brilliant, clear pink flowers to such an extent that the foliage is usually hidden. It has been successfully grown by many for Christmas sales, and brought very high prices. It is undoubtedly one of the most useful Christmas plants now in existence, owing to its extreme floriferousness. Its chief requirements are a soil composed of well rotted sods and leaf mold, and a warm, moderately dry atmosphere, with an abundance of ventilation. Produces the most useful and durable plants in an atmosphere at from 60 to 70 degrees, but the foliage must be kept dry. As it requires the temperature of a living room, it can be successfully grown as a house plant. 20c ea.; \$15.00 per 100.

**Light Pink Lorraine.**—(Lonsdale's Variety.) A beautiful light pink sport from the above variety. A counterpart, except in color. Entirely distinct and vastly superior to Nana Compacta. 30c ea.; \$25.00 per 100.
